

TFT CSS Assignment

1. Try to create a layout similar to this. (Please use any random image)

This should be responsive i.e. upon resizing the screen it should become like this:

Upon moving to an even smaller screen, it should become like this:

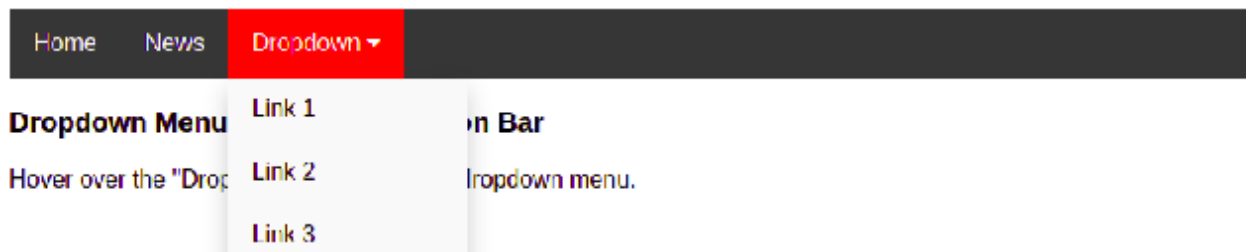

So, the basic idea is that on a smaller screen you should see fewer images. When the screen moves to something like a mobile phone it should have one image at a time.

2. Create a navbar like this

On hovering, I should see something like this

3. Try creating this page

TVS Apache RTR 200 4V

Overview

12 images

See Colors

On clicking the left and right arrow, we'd add the functionality to switch image once we move to JS.
